

Gen

Play- and Communication board

Gen is a collapsible communication board. The board itself is made of transparent folded plastic and has four rows of pockets for cards/pictures. The working area is 43 x 24 cms. The transparent panel is easily released from the frame. Different colour markings can be taped on the back.

The board is used in communication training with object-picture, picture-symbol or letter-word-picture and as a communication aid for “reminder-pictures” instead of a written check-list. The plastic panel can also be purchased separately.

The board also makes an excellent dummy when playing bridge outdoors.

The communication aid can be combined with PocketFolder, which is a pocket album with 10 transparent plastic pockets for 20 cards with a maximum size of 9x9 cms.
